

List of Claims

40. **(Currently amended)** A gateway to a packet-based data network comprising:

A transceiver adapted to establish a radio frequency link with a mobile device;

A first interface adapted to facilitate data flow between the mobile device and the data network; and

A controller adapted to regulate data flow between the mobile device and the data network based on information stored on a consideration related policy database, which is connected to the data network through a second interface.

41. **(Currently amended)** A communication system comprising:

A consideration-related policy database connected to a packet based data network through a second Interface, two or more gateways functionally associated with a packet based data network, wherein each gateway comprises:

A transceiver adapted to establish a radio frequency link with a mobile device;

A first interface adapted to facilitate data flow between the mobile device and the data network; and

A controller adapted to regulate data flow between the mobile device and the data network based on information stored on the consideration related policy database.

42. **(Currently amended)** A method of providing data to a mobile device comprising:

Establishing a data link between the mobile device and a radio frequency transceiver functionally associated with a packet based data network through a first interface;

Regulating data between the mobile device and the packet based data network based on information stored on a consideration related policy database which is connected on the data network through a second interface.
